

The future of Uroflowmetry

Why use the Urogenie?

You will transform your office uroflow process. No more headaches with printing and scanning the study results. Billing is easier than ever with automatic data upload into the cloud.

Automatic upload of uroflow results into EMR, including EPIC. Phone application allows both doctors and patients to see results instantly.

Simple device can be used anywhere, even in the patient home

No need to empty the uroflow chamber

Streamlined billing for more revenue and efficient office flow

Patented technology from Children's Hospital of Philadelphia (CHOP) licensed exclusively to Urogenie

Uroflowmetry remains the most commonly used tool to diagnose lower urinary tract issues. Yet the methods used today are outdated and inefficient.

Our device and software is a complete solution which can be used anywhere, even in the comfort of the patient home.
